Pipe Vice

The Alpha Pipe Vice is a screw type vise that may be used for clamping tubing, pipe, fittings and valves. It features a sliding handle for extra leverage. Equipment may be loaded from three sides.

The vise clamps up to 8 5/8 inches diameter.

The vise is an excellent addition to your equipment and have a proven history of success. The gripping ability is exerted by hand and no more than that is ever needed. If slipping ever occurs, the tong dies are simply replaced. The tong dies are the only parts that should experience wear.

SPECIFICATIONS

PARTS LIST	8 INCH	QTY.
