

OMEGA™

Bridge Plug

Wireline

Meet the Omega™: a non-vented plug meticulously crafted for long-term plug and abandonment applications. Engineered for efficiency, this economy plug boasts a maximum pressure rating of 6k. Designed to be run on a Baker or GO style setting tool, the Omega™ ensures a seamless “set and forget” experience, providing reliable performance with minimal intervention. Because of the floating mandrel design The Omega™ bridge plug is recommended against setting it in an unbalanced environment. Reach out to Alpha Oil Tools if you have any technical questions regarding this advanced plug.
